

Superior service requires superior gear...

CodeBlue Sound & Entertainment is an event production and AV rental company based in Dallas, Texas. Company services include sound reinforcement, DJ equipment backline rentals, video projection, live band setups, multi-track live recordings, and lighting. CodeBlue prides itself on using high-end, industry standard equipment, respected and utilized by artists and fellow professionals alike. The company specializes in providing for small and medium sized event formats which results in personalized customer service at all steps of event planning to best fit the client's needs.

The Company

Forget what you know about traditional loudspeakers. The Eastern Acoustic Works NT Series redefines conventional sound reinforcement products. Using the most advanced technology on the market, on-board processing developed by EAW fixes inherent problems found in all loudspeakers, especially at high volumes. The result is studio quality sound on steroids and a speaker you really have to hear to believe. If "perfect" is impossible to achieve, then the EAW NT series is as good as it gets, and CodeBlue is proud to offer this as its main system, one that is a testament to the company's pursuit of excellence.

Sound

A single sheet of promotional material can only give a brief glimpse into the potential of the company. For questions and inquiries about the CodeBlue experience, please contact owner **Clint Rohr**. Direct contact information is below, followed by a sampling of artists and clients who have already been touched by the experience of CodeBlue Sound & Entertainment...
